EDUCATION

Temple University *Present*
PhD Student in Bioinformatics
Department of Biology
Institute for Genomics and Evolutionary Medicine (iGEM)
Acme Computational Molecular Evolution Group (ACME)

New York University *2018*
Masters of Science in Biology
Department of Biology
Masters Thesis topic: "The current state of affairs: the twilight of tobacco"
'How electronic cigarettes impact humanity's relationship with nicotine'

SUNY Stony Brook University *2011*
Bachelors of Science in Biochemistry
Department of Biochemistry and Cell Biology
Laboratory of Chemosensory Systems and Behavior

EXPERIENCE

Temple University Fall 2021-Present
Graduate Teaching Assistant *Genomics in Medicine*

· Directing over one hundred and fifty students in a cross-listed (Graduate and Undergraduate) course.
· Responsible for holding office hours and communicating with students.
· Provide guidance on assignments, help with interpreting primary research articles and offered guidance on classroom projects.

Temple University Fall 2020
Graduate Teaching Assistant *Genomics in Medicine*

· Directed over one hundred and sixty students in a cross-listed (Graduate and Undergraduate) course in a virtual format.
· Responsible for holding office hours and communicating with students.
· Provide guidance on assignments, help with interpreting primary research articles and offered guidance on classroom projects.

Bioinformatics Studio at Temple University Spring 2018 - Present
Co-Founder

· The Bioinformatics Studio is an inclusive and hands-on environment for learning, training, sharing, and most importantly doing bioinformatics at Temple University.
· A student run organization that provides guided hands-on training at every level of research and computational expertise in an open studio format.

Temple University Spring 2020 - Present
Graduate Research Assistant

· Conducting research in molecular evolution evaluating the effect of multinucleotide mutational events on the inference of parameters of gene adaptation. This work involves the use and development of statistical models and computational software. Our current implementation is available as an extension in the Hypothesis testing in Phylogenies (HyPhy) suite of analyses.

Temple University Fall 2019
Graduate Teaching Assistant *Genomics in Medicine*

· Directed over one hundred students in a cross-listed (Graduate and Undergraduate) course.
· Responsible for holding office hours and communicating with students. Additionally, provided guidance on assignments, helped with interpreting primary research articles and offered guidance on classroom projects.

Temple University Spring 2019
Graduate Teaching Assistant *Introduction to Organismal Biology*

· Directed forty students over two sections of the Introduction to Organismal Biology Laboratory course.
· Instructed students on laboratory exercises, provided feedback, and demonstrated proper techniques.

Temple University Fall 2018
Graduate Teaching Assistant *General Biology*

· Directed forty students over two sections of the "General Biology I" Laboratory course
· Instructed students on laboratory exercises, provided feedback, and demonstrated proper techniques.

ROTH Capital Partners Spring 2018
Intern *Healthcare Investment Banking*

· Participated in the process for the Initial Public Offering (IPO) of BioNano Genomics, an optical mapping company (Ticker: [NASDAQ:BNGO]).
· Responsible for current healthcare IPO market data, preparing pitch decks for senior managers and materials for mergers and acquisition (M&A) deals.

New York University Spring 2018
Adjunct Professor *Fundamentals of Bioinformatics*

· Directed twenty students in a weekly recitation section.
· Reviewed theory and topics discussed in lecture and provided guidance and hands-on support in the use of bioinformatics software and analysis.

New York University Fall 2017
Adjunct Professor *Molecules of Life*

· Directed forty students over two sections in a weekly laboratory course.
· Reviewed theory and topics discussed in lecture and provided guidance and hands-on support in the use of standard laboratory techniques.

New York University Spring 2017
Adjunct Professor *Principles of Biology Laboratory*

· Directed forty students over two sections in a weekly laboratory course.
· Reviewed theory and topics discussed in lecture and provided guidance and hands-on support in the use of standard laboratory techniques.

ORGANIZATIONS

Member: The National COVID Cohort Collaborative (N3C)

Member: American Physiological Society (APS)

Member: Vertebrate Genomes Project (VGP)

Member: Vertebrate Genomes Project - Genome Assembly Group

Member: Models of Infectious Disease Agent Study (MIDAS)

Member: CDC-MIDAS COVID-19 working group

Co-Founder: The Bioinformatics Studio at Temple University

Member: Society for Molecular Biology and Evolution

Member: Biology Graduate Student Society at Temple University

Member: New York Academy of Sciences
