- **Collection of metadata is critical to sample processing and analysis**
- **Dr. Lucaci will go over KoboToolBox next**

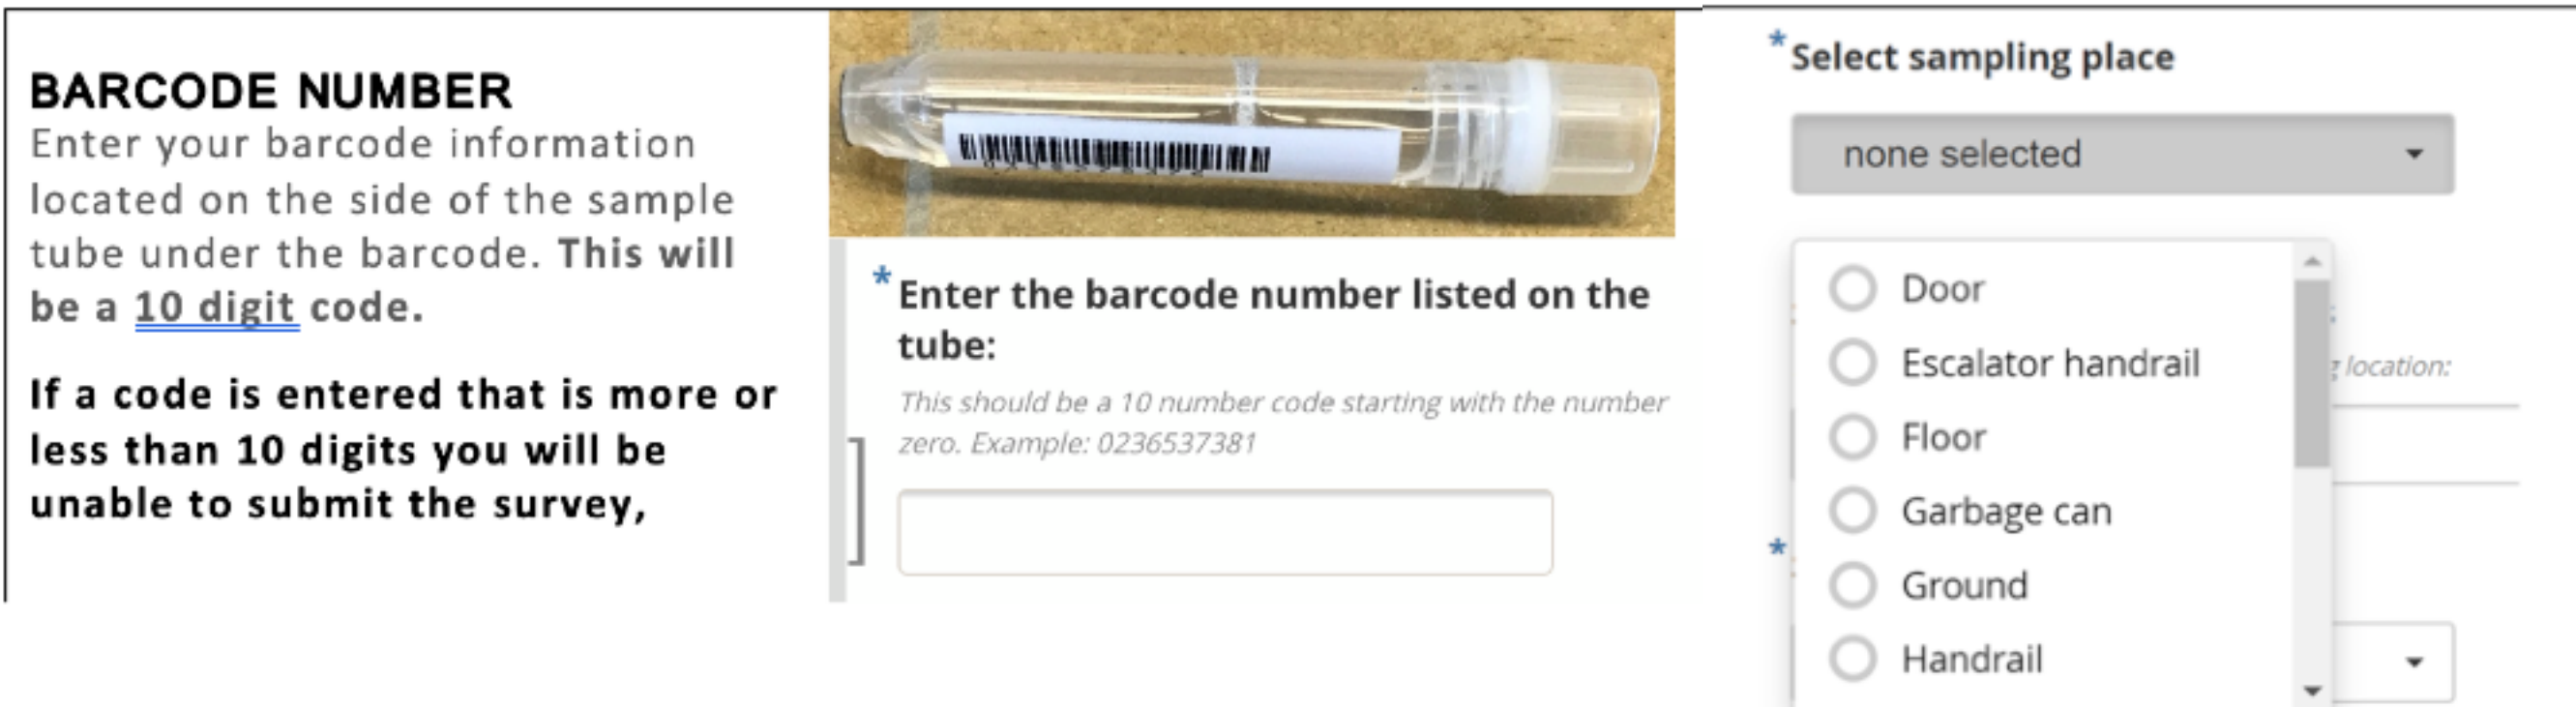

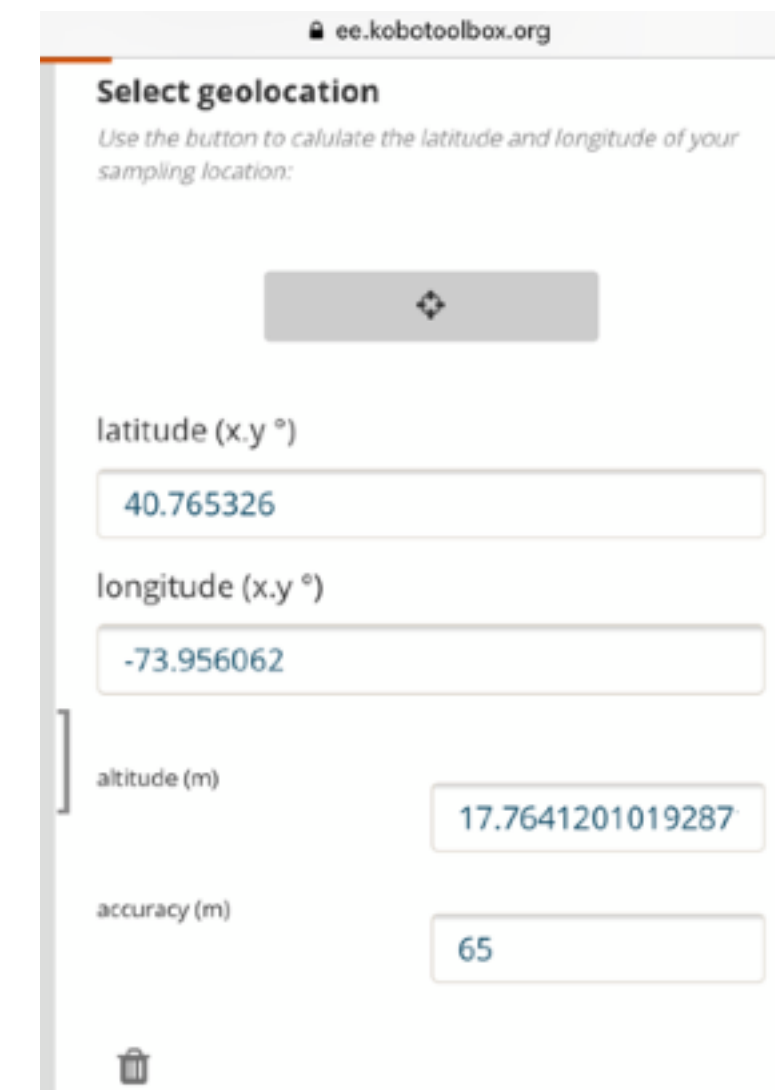

Metadata Collection: KoBoToolbox

KoBoToolbox is a free open-source tool for mobile data collection, available to all. The platform is:

- Free to use
- Compatible with most computer browsers
- Open source

A screenshot of the KoBoToolbox barcode entry form. It includes a section for 'BARCODE NUMBER' with instructions to enter a 10-digit code from a sample tube. Below this is a text input field. To the right, there is a section for 'Select sampling place' with a dropdown menu showing 'none selected' and a list of options: Door, Escalator handrail, Floor, Garbage can, Ground, and Handrail.A screenshot of the KoBoToolbox geolocation form. It includes a section for 'Select geolocation' with instructions to use a button to calculate latitude and longitude. Below this are input fields for latitude (x,y °), longitude (x,y °), altitude (m), and accuracy (m). The values entered are 40.765326, -73.956062, 17.7641201019287, and 65 respectively.

Register for KoBoToolbox!

We will confirm that we have your username and metadata plan!
