

UPVAtlas Highlights

UPVAtlas
Urban & Peri-urban RNA Virus Atlas

- **Deepest metatranscriptomic profiling of global cities to date.**
We examined ~3K samples (collected 1H2020), containing >100B reads to study RNA virus biology in urban environments, their hosts, and pathogenicity.
- **Our analysis uncovered two novel *Duplornaviricota* phyla** supporting the polyphyletic nature of this clade, with support from the published literature (Neri et al., 2022, Zayed et al., 2022).
- **Selection analyses of RdRp identified amino acid sites with directional selective pressures**, this may describe local adaption of viral groups.

CAMP: A Modular Workflow System for Scalable Metagenomics Analysis

- *CAMP provides a Snakemake-based, modular framework for building reproducible metagenomics workflows that can run individual analysis steps independently or connect them into larger multistep pipelines.*

The screenshot shows the NAR Genomics & Bioinformatics website. The header includes the NAR logo and navigation links: Issues, More Content, Submit, Alerts, and About. A dropdown menu for 'NAR Genomics and E' is visible on the right. The main content area features a journal article titled 'CAMP: a modular metagenomics analysis system for integrated multistep data exploration' with an Open Access icon. The authors listed are Lauren Mak, Braden Tierney, Wei Wei, Cynthia Ronkowski, Rodolfo Brizola Toscan, Berk Turhan, Michael Toomey, Juan Sebastian Andrade-Martínez, Chenlian Fu, Alexander G Lucaci, Arthur Henrique Barrios Solano, João Carlos Setubal, James R Henriksen, Sam Zimmerman, Malika Kopbayeva, Anna Noyvert, Zana Iwan, Shraman Kar, Nikita Nakazawa, Dmitry Meleshko, Dmytro Horyslavets, Valeriia Kantsypa, Alina Frolova, Andre Kahles, David Danko, Eran Elhaik, Pawel Labaj, Serghei Mangul, The International MetaSUB Consortium, Christopher E Mason, and Iman Hajirasouliha. The article is from Volume 8, Issue 1, March 2026, with the DOI 10.1093/nargab/lqaf172. The publication date is 16 January 2026. On the left side of the article, there is a section for 'Article Contents' with links to Abstract, Introduction, and Methods.
